SUMMARY

Informatics graduate with a proven ability to design and build functional, user-focused web applications, from UI to database logic. Currently working as a Web Developer, with a goal to grow into a well-rounded technologist bridging web development, data science, and graphic design.

EXPERIENCE

Oren Retail 13 Feb 2026 – Present

Staff Administration & Inventory

- Maintained inventory data accuracy and generated operational reports used for day-to-day business decisions.
- Tracked stock movement patterns and flagged discrepancies, improving reliability of inventory records.

Student Employee – Ahmad Dahlan University 01 Aug 2024 – 31 Jan 2025

Social Media & Content Admin

- Produced 40+ visual assets including feeds, flyers, banners, and brochures to support department branding and event promotion.
- Managed department website updates and social media publishing to maintain consistent and up-to-date information.
- Handled student data input and documentation to support administrative needs of the study program.

MSIB - Celerates Acceleration Program 16 Feb – 30 Jun 2024

Data Science Intern

- Built an employee retention analytics dashboard with an LSTM-based prediction model, achieving 98.83% accuracy and 1.16% MAPE, deployable as a decision-support tool for HR and management.
- Handled full pipeline from data collection and preprocessing to model evaluation using Python, covering analytics, visualization, and machine learning fundamentals.
